Subject: RE: Questions for DrillingInfo Users

Sara,
Sorry for the delayed response.

- 1.Targeting potential sources for partial compliance evaluations.
- 2.User ID and password
- 3.Search for number of well sites in a geographic location, dated production started and if still producing. Use the information to identify well sites that may be subject to NSPS OOOO or NSPS OOOOa for on-site partial compliance evaluations.
- 4.None at this time.
- 5.Continued access to resources for identifying and targeting potential sources.

Let me know if you have any questions.
Denis

Subject: Questions for DrillingInfo Users

All,

You have been identified as folks who actively use your DrillingInfo license. Because the program offers a lot of information, and in an effort to maximize the value we get from our subscription, DrillingInfo has put together a couple of questions that would allow them to tailor any needed training or support. If you have a few moments to respond, I would appreciate it. Please let me know if you have any questions.

DrillingInfo Questions:

- 1) What does your role at EPA lead you to do within DrillingInfo?
- 2) What tools/functions do you currently use when you login to DrillingInfo?
- 3) What information do you search for, and what do you do with that information after you retrieve it?
- 4) Is there anything you wish DI could provide that it currently does not? (ie: Water information, Frac Chemical compounds and amounts, Forecasting future production, etc.)
- 5) What's the best way to support you to help you accomplish your goals?
